SUMMARY

Software Engineer with **2+ years of professional experience** building and deploying production-grade backend applications using **Python, Django, and Django REST Framework (DRF)**.

Experienced in developing **RESTful APIs, authentication and authorization, database-driven applications, asynchronous processing, third-party integrations, and production deployments**. Hands-on experience with **PostgreSQL, MySQL, Django ORM, Redis, Celery, Docker, AWS EC2, Nginx, Gunicorn, and Linux**, with a focus on scalable, secure, and maintainable backend systems.

PROFESSIONAL EXPERIENCE

Software Engineer | Affy Cloud IT Solutions: Aug 2024 – Present | Bhopal, India

- Developed and maintained **production-grade backend applications** using **Python, Django, and Django REST Framework (DRF)**.
- Designed and implemented scalable **RESTful APIs** for authentication, business workflows, data management, and third-party integrations.
- Built asynchronous background workflows using **Celery and Redis** for scheduled and long-running backend tasks.
- Designed and optimized relational database models using **PostgreSQL, MySQL, and Django ORM**, with a focus on query performance and application scalability.
- Implemented secure **authentication, authorization, and Role-Based Access Control (RBAC)** across backend applications.
- Deployed and maintained production applications using **AWS EC2, Docker, Nginx, Gunicorn, Git, and Linux**.

Software Engineering Intern | Affy Cloud IT Solutions: May 2024 – Jul 2024 | Bhopal, India

- Contributed to backend application development using **Python, Django, Django REST Framework, and SQL**.
- Assisted in developing and testing **RESTful APIs**, database-driven features, and backend business logic.
- Worked with **Django ORM, PostgreSQL/MySQL, Git, and Postman** for application development, debugging, and testing.

TECHNICAL PROJECTS

AI Investment Platform | Python, Django, DRF, PostgreSQL, Redis, Celery:

- Developed a scalable **AI-powered backend platform** using **Python, Django, and Django REST Framework** for investment analysis and automated financial workflows.
- Designed secure **RESTful APIs** supporting investment workflows, user management, AI processing, and data-driven application features.
- Implemented asynchronous AI processing pipelines using **Celery and Redis**, enabling long-running tasks to execute in the background without blocking API requests.
- Integrated AI services into Django backend workflows for **document processing, financial analysis, and automated investment insights**.
- Optimized backend performance through **PostgreSQL query optimization, Redis caching, asynchronous processing, and efficient API design**.

Online Examination Platform (Edrizz) | Python, Django, DRF, PostgreSQL:

- Developed scalable backend services using **Python, Django, and Django REST Framework** for online examinations, mock tests, analytics, and student progress tracking.
- Designed and implemented **RESTful APIs** for examination workflows, user management, test submissions, results, and performance analytics.
- Implemented asynchronous processing using **Celery and Redis** for notifications and long-running backend tasks.
- Designed and optimized **PostgreSQL database models** using Django ORM to support examination and student data management.
- Implemented secure authentication, authorization, and backend business logic for different user roles and application workflows.
- Contributed to a production-ready platform deployed on **edrizz.com**, the **Google Play Store**, and the **Apple App Store**.

E-Commerce Platform | Django, DRF, PostgreSQL, MySQL:

- Developed a production-ready **e-commerce backend** using **Python, Django, Django REST Framework, PostgreSQL, and MySQL**.
- Designed REST APIs for **products, orders, shopping carts, inventory, and user management**.
- Implemented **JWT authentication, Role-Based Access Control (RBAC), and Razorpay payment gateway integration**.
- Optimized database queries and schema design using **Django ORM** to improve backend performance and scalability.
- Integrated third-party services for **payments, notifications, and order management** using modular and reusable backend architecture.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

Backend: Django, Django REST Framework (DRF), RESTful API Development

Databases: PostgreSQL, MySQL, MongoDB

ORM: Django ORM

Async & Caching: Celery, Redis, Background Task Processing

Cloud & DevOps: AWS EC2, Docker, Nginx, Gunicorn, Linux

Authentication & Security: JWT, Authentication & Authorization, Role-Based Access Control (RBAC)

Tools: Git, GitHub, Postman, VS Code

Engineering: Object-Oriented Programming, System Design, Database Design, API Design, Debugging, Performance Optimization, Testing, Scalability, Maintainability, Third-party Integrations, Production Deployment

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV), Bhopal
